

# >> The smart ebike

Effortless and comfortable, dynamic and elegant: that's the smart ebike. Discover your city and see how easy it is to zip around in style.

## >> Powered for relaxation.

For more comfortable travel.

Get around the city without getting into a sweat. The smart ebike comfort edition is available in either crystal white or matte dark grey and makes urban mobility easier and more enjoyable. The comfort saddle and high handlebars provide an upright and comfortable seating position. The suspension fork optimizes driving dynamics, allowing for a comfortable ride on various road conditions. Thanks to the standard luggage rack, it's easy to take your belongings along with you. Riding a pedelec has never been so comfortable.

### **USB interface:**

The standard USB interface can be used to charge your smartphone while you're riding – securely held in place by the optional smartphone cradle<sup>1</sup>.

### **Basic display with operating element on the handlebars:**

The drive and generator levels, speed or remaining power are always in your field of vision – thanks to the basic display standard. The handlebar operating element allows you to switch between drive and generator levels while cycling, without taking a hand off the handlebars.

### **Suspension fork:**

The air spring suspension fork can be individually adjusted to the cyclist for enhanced comfort. As a result, you reach your destination feeling even more relaxed.

### **Luggage rack:**

Matching the paintwork colour and the design of the ebike, the luggage rack is both sporty and practical.

### **High handlebars:**

Have a handle on everything. The high handlebars enable a more upright seating position and comfortable cycling.

<sup>1</sup>The smartphone cradle is not part of the standard equipment of the smart ebike comfort edition.

#### Accent trim parts and colour variants:

The smart ebike comfort edition is available in two attractive colour variants; crystal white with electric green accent trim parts or matte dark grey with flame orange accent trim parts. Both variants are very comfortable – which one will you choose?

#### Comfort saddle:

A pressure-relieving gel in the saddle enhances comfort. What's more, the comfort saddle heats up much less in the sun than other black saddles you might be used to.

#### Battery:

With 423 watt hours, you can cover up to 100 kilometres.<sup>2</sup>

#### Brakes:

The hydraulic disc brakes at the front and rear facilitate higher braking safety.

#### Carbon toothed belt:

Made of high-strength carbon fibre, the highly reliable toothed belt transmits power to the rear wheel without the need for lubricant or maintenance. The optional, exchangeable belt pulley with 20 or 24 teeth enables individual adjustment of the basic gear ratio.

#### Motor:

With 350 watts<sup>3</sup> at your disposal, getting around the city is a breeze. In generator mode, the motor also serves as a provider of energy.

<sup>2</sup>Depending on the cyclist, the cycling style, the topography of the route and the drive or generator level selected.

<sup>3</sup>Country-specific deviations: 250 watt for EU countries and Switzerland except UK, 200 watt for UK, 350 watt for USA/Canada.
